Group learning dynamics: normalized trained-task indices
(A) Trained-task performance
Both: tau=1.3 blocks, C=0.62
Strength: tau=2.8 blocks, C=0.54
Angle: tau=0.88 blocks, C=0.72
Baseline-normalized MAE
Training block (original shots, 10 per block)
(B) Within-block variability
Both: decay not identifiable
Strength: tau=5 blocks, C=0.59
Angle: decay not identifiable
Baseline-normalized trial SD
Training block (original shots, 10 per block)
Shading: between-participant mean +/- SEM; dashed: single-exponential fit. Different trained modalities; no raw-unit pooling.
